SUMMARY

Product manager who has driven cross-functional delivery across engineering, sales, and operations teams at a fast-growing SaaS company, shipping features used by 264+ business clients and 16,000+ end users. Skilled in sprint planning, timeline and risk management, stakeholder coordination, and project documentation. Proficient in Google Workspace.

EXPERIENCE

Associate Product Manager + UX manager

May 2025 - Present

Katha Ads — Kerala, India

An influencer marketing company connecting 16,000+ social media creators with brands for campaign planning and tracking.

- Enabled Katha's transition from a services agency to a self-serve SaaS platform by coordinating engineering, sales, and account management teams to design and roll out new product workflows.
- Drove a 27% search-to-campaign conversion rate (50K+ creator searches across 264 brands) on the Creator Discovery feature by coordinating sprint cycles across engineering and design from requirements through launch.
- Improved the experience for 8,500+ active creators by leading a cross-functional redesign of the company's creator-facing app (landing page and onboarding journey), coordinating timelines between design and engineering.
- Accelerated sprint delivery by gathering and prioritizing requirements from Sales and Account Management teams, converting them into sprint-ready tasks and tracking execution to completion.
- Streamlined creator operations (invites, approvals, and outreach) by managing a portfolio of internal tool enhancement projects from scoping to release.
- Maintained consistent release quality across three products (client portal, creator app, and internal tools) by coordinating documentation, QA, and release processes.
- Strengthened cross-functional delivery by co-owning the project lifecycle with engineering, design, sales, and operations teams, from requirement validation through post-release QA.
- Identified and prioritized product improvements by running structured user feedback analysis and usability reviews, presenting findings and recommendations directly to stakeholders.

INTERNSHIPS

Product Operations Intern

May 2024 - Aug 2024

Pixelo Digital — Navi Mumbai, India | Domain: B2B SalesTech SaaS

- Improved onboarding experience for B2B customers by resolving product issues on Prospectoo, a contact-data and CRM tool, and coordinating fixes with Product and Engineering teams.
- Supported feature adoption on Prospectoo by validating user feedback with Product and Engineering stakeholders and tracking requested fixes to resolution.

Software Developer Intern

Jan 2024 - Apr 2024

GIR Software Services — Texas, USA | Domain: Software Development / ERP

- Reduced manual work on recurring business processes by developing automation scripts within NetSuite, an ERP platform, on defined delivery timelines.
- Improved system reliability by diagnosing and resolving configuration and workflow issues in NetSuite, documenting fixes for stakeholder teams.

EDUCATION

B.Tech, Information Technology

I.K. Gujral Punjab Technical University — RBPU Hoshiarpur | Graduated: 2024
